EDUCATION

Motilal Nehru National Institute Of Technology Allahabad

2021 - 2025

B.Tech, Computer Science and Engineering

• GPA: 8.59/10

EXPERIENCE

Oracle

Jan 2026 - Present

Applications Developer - I

Tech Stack: Python, LangGraph, LangChain, FastMCP, Generative AI, Agentic AI, Prompt Engineering

- Develops and deploys Generative AI agents with natural language processing to automate internal business workflows, reducing manual effort by 86%
- Builds MCP server to track employee holidays, anniversaries and birthdays, improving manager visibility
- Engineers an A2A (Agent-to-Agent) orchestrator that enables multi-agent communication, applies AI model optimization, monitors AI quality and latency metrics, integrates user assertion for secure and authenticated interactions, and deploys using Docker/Kubernetes
- Awarded "Rockstar of the Month" (Applause Award, March 2026) for exceptional contributions and impact

Qualcomm India

Jan 2025 - Jan 2026

Associate Software Engineer

Tech Stack: C, C++, Computer Networking - IPv4, IPv6, Linux Kernel, Drivers, Network Stack, Netfilter

- Worked on Linux kernel networking stack (IPv4/IPv6) for automotive chipsets
- Contributed to datapath development for handling network traffic efficiently across embedded systems

Salesforce India

May 2024 - Jul 2024

SDE Intern

Tech Stack: Lightning Web Components, Prompt Engineering, JavaScript, Large Language Models

- Built an LLM-powered feature to auto-generate UI components (buttons, text blocks) in Content Builder using Lightning Web Components
- Integrated prompt engineering techniques to deliver personalized and context-aware suggestions

SKILLS

Languages: Python, C++, C, Java

Frameworks & Tools: Spring Boot, FastMCP, LangGraph, LangChain, Node.js, Next.js, Tailwind, Material UI, Git, Docker, Kubernetes, MLOps

AI & ML: Generative AI, Agentic AI, AI Workflows, MCP Server, Machine Learning, Large Language Models, Prompt Engineering, Natural Language Processing, AI Model Optimization, AI Quality And Latency Metrics

Core CS: Data Structures & Algorithms, Operating Systems, OOP, Database Management Systems, Networks

PROJECTS

Deepfake Audio Detection System [Google Colab](#)

- Designed and evaluated a CNN-based deepfake audio detection model using Mel-spectrogram features
- Achieved approximately 86.7% test accuracy on the ASVspoof 2019 dataset
- Built an end-to-end machine learning pipeline covering preprocessing, data augmentation, model training, and quality evaluation
- Engineered a Flask-based web application for real-time .wav, .mp3, and .flac audio uploads and deepfake detection

Kumbh Connect [GitHub](#)

- Built a full-stack MERN application tailored to the accommodation listing and rental needs of Kumbh attendees
- Implemented a booking workflow with history tracking and category-based filtering to improve the user experience

ACHIEVEMENTS

- Knight (Rating 1955) on LeetCode (Top 4.7%)
- Institutional rank of 30 at GeeksforGeeks

CERTIFICATIONS

- Oracle AI Vector Search Certified Professional: Oracle, Feb 2026 (RAG, Vector Search)
- Oracle Cloud Infrastructure 2025 Certified Data Science Professional: Oracle, April 2026 (Oracle cloud)
- Prompt Engineering Deep Dive: O'Reilly, Jan 2026 (Prompt Engineering)
